Patient Information Sheet - Glutathione

This medicine was compounded specifically for you in a pharmacy in order to fill the prescription your doctor wrote for you. It was specifically made to meet your individual needs. For this reason, no standardized information or literature is available with your prescription. If you have not done so, please discuss this medicine with your doctor to ensure that you understand (1) why a compounded medication has been prescribed, (2) how to properly take this medication, and (3) the interactions, if any, this medicine may have with any other medicines you are taking.

Compounding is a long-standing pharmacy practice that allows doctors to treat their patients' individual needs without being restricted only to off-the-shelf medicines or devices. This medicine was prepared in a compounding pharmacy to meet the specifications ordered by your doctor.

Call your doctor if you experience any side effects, if you are taking additional medicines that may interact with this compounded medicine, or if you have allergies or other medical conditions that should be noted. Call our pharmacists if information on the label is not clear to you or you have any concerns regarding precautions, ingredients, or proper storage. Our pharmacists are available to address any additional questions or concerns.

Medication: This compound contains glutathione, an antioxidant synthesized in all cells of the body from amino acids. Glutathione helps to protect cells from damage or breakdown.

Use: This medication may be prescribed for cardiovascular disease, certain central nervous system diseases including Alzheimer disease, autism, neuropathy, and mood disorders, cystic fibrosis, skin improvement, HIV, infertility, eye disorders, and liver disease. It may be prescribed for other conditions as determined by your prescriber.

Side Effects: Side effects of this medication may include flatulence and loose stools, flushing, and weight gain.

Precautions: An allergic reaction to this medication is unlikely, but seek immediate medical attention if you experience a rash, itching, swelling, dizziness, or trouble breathing. Do not use it as an inhalation if you have asthma as it may worsen symptoms.

Dosage and Administration: This medication may be prescribed as a nasal spray, suppository, capsule, or as a cream or gel for topical application. It may also be prescribed in an injectable or nebulized form.

Storage, Beyond Use Dating and Disposal: The Beyond Use Date is a scientifically derived "expiration" date for each unique formulation, and storage depends on the stability of each individual formulation. Controlled room temperature storage is 68-77℉, and storage under refrigeration is 36-46℉. Please refer to your medication label and auxiliary labels for specific storage requirements and beyond use dating. For information on medication destruction, please visit www.fda.gov and search how to dispose of unused medicines.
