Patient Information Sheet - Ivermectin/Azelaic Acid/Metronidazole Topical

This medicine was compounded specifically for you in a pharmacy in order to fill the prescription your doctor wrote for you. It was specifically made to meet your individual needs. For this reason, no standardized information or literature is available with your prescription. If you have not done so, please discuss this medicine with your doctor to ensure that you understand (1) why a compounded medication has been prescribed, (2) how to properly take this medication, and (3) the interactions, if any, this medicine may have with any other medicines you are taking.

Compounding is a long-standing pharmacy practice that allows doctors to treat their patients' individual needs without being restricted only to off-the-shelf medicines or devices. This medicine was prepared in a compounding pharmacy to meet the specifications ordered by your doctor.

Call your doctor if you experience any side effects, if you are taking additional medicines that may interact with this compounded medicine, or if you have allergies or other medical conditions that should be noted. Call our pharmacists if information on the label is not clear to you or you have any concerns regarding precautions, ingredients, or proper storage. Our pharmacists are available to address any additional questions or concerns.

Medication: This compounded prescription contains ivermectin (an antiparasitic agent with antiinflammatory activity), azelaic acid (a dietary constituent that produces antimicrobial activity), and metronidazole (an antibiotic).

Use: This medication may be prescribed for the treatment of rosacea or acne.

Side Effects: Often the topical use of a medication provides more localized effects, which allows the body to avoid most of the systemic side effects. Localized irritation or burning is possible. Other possible side effects may include headache, hypopigmentation, or a tingling sensation.

Precautions: Skin irritation (itching, burning, stinging) may occur, usually during the first few weeks of therapy. Discontinue use and contact prescriber or pharmacist if severe skin irritation or sensitivity occurs.

Dosage and Administration: This medication is typically dispensed in a cream for topical application, usually once or twice daily or as directed by your prescriber. Wash and dry the area prior to application. Avoid contact with eyes and wash hands after application.

Storage, Beyond Use Dating and Disposal: The Beyond Use Date is a scientifically derived "expiration" date for each unique formulation, and storage depends on the stability of each individual formulation. Controlled room temperature storage is 68-77℉, and storage under refrigeration is 36-46℉. Please refer to your medication label and auxiliary labels for specific storage requirements and beyond use dating. For information on medication destruction, please visit www.fda.gov and search how to dispose of unused medicines.
