

Patient Information Sheet – Thymol Solution/Tincture

This medicine was compounded specifically for you in a pharmacy to fill the prescription your doctor wrote for you. It was specially made to meet your individual needs. For this reason, no standardized information or literature is available with your prescription. If you have not done so, please discuss this medicine with your doctor to ensure that you understand (1) why you have been prescribed a compounded medicine, (2) how to properly take this medicine, and (3) the interactions, if any, this medicine may have with any other medicines you are taking.

Compounding is a long-standing pharmacy practice that allows doctors to treat their patients' individual needs without being restricted only to off-the-shelf medicines or devices. This medicine was prepared in a compounding pharmacy to meet the specifications ordered by your doctor.

Call your doctor if you experience any side effects, you are taking additional medicines that may interact with this compounded medicine, or if you have allergies or other medical conditions that should be noted. Call our pharmacists if information on the label is not clear to you or you have any concerns regarding precautions, ingredients, or proper storage. Our pharmacists are available to address any additional questions or concerns.

Medication: This compounded prescription contains thymol, a natural antiseptic.

Use: This medication may be used for fungal infections of the skin and nails. It may also be prescribed for other conditions as determined by your practitioner.

Side Effects: The base for this medication commonly contains alcohol, so local irritation or burning are possible.

Administration: This compound is administered as a solution and is usually brushed or rubbed onto the affected area 2-3 times daily. Allow the solution to dry before covering. Always follow your practitioner's or pharmacist's instructions.

Storage, Beyond Use Dating and Disposal: It is very important to protect thymol solution from light to maintain potency. Store at controlled room temperature (68°-77°F). The "Beyond Use Date" is the expiration date for compounded medicines. This compound is generally good for 6 months after the dispensing date, however, it is always best to refer to your medication's label for specific storage requirements and beyond use dating. Search "How to Dispose of Unused Medicines" at www.fda.gov for info on medication destruction.
